

Lowerwatt Invoice Field Mapping

The tool runs in one of two modes:

1. New account. Extract the account-level fields AND the invoice-level fields. Sets up the account from the first bill and creates its first invoice.
2. Ongoing invoice. Extract only the invoice-level fields. Creates a new invoice record on an account that already exists.

Account-Level (filled once at setup, from the first bill)

Field	Table	Type	How it works
Name on Utility Bill	Accounts	Text	Name printed on the bill, usually the property name.
Utility	Accounts	Linked Record	Provider name; link to the Utility record.
Supplier	Accounts	Text	Third-party energy supplier. Blank when utility = supplier.
Account #	Accounts	Text	Account number from the bill. Required, unique.
Service Address	Accounts	Address	Full service address (street, city, state, zip).
Rate Class	Accounts	Text	Rate class string (e.g. GS-1 - Com Rate: 261). Blank if not shown.
Meter #	Accounts	Text	Meter number from the bill.
Meter Size	Accounts	Text	Meter size (water/sewer). Blank if not on bill.
Net Meter / Solar	Accounts	Single Select	Yes / No / N/A. Detect solar generation; bill may not label it.
Unit of Measurement	Accounts	Single Select	CCF / Gallons. Unit the water bill measures usage in.
Paying Sales Tax	Accounts	Single Select	Yes / No. Read from the tax line/checkbox on the bill.
Procurement Acc #	Accounts	Text	Supplier-switch number. May be labeled service agreement / PO ID.
Phone #	Accounts	Phone	Phone number(s); can be several lines. Telecom.
Type of Service	Accounts	Utility Type	phone / internet / TV, inferred from the charges, not a label.

Invoice-Level (extracted per bill, ongoing)

Field	Table	Type	How it works
Billing Period Start / End	Account Invoices	Date Range	Bill/usage period. Water may show meter read start/end instead.
Usage per Billing Period	Account Invoices	Number	Usage for the period. Sewer is flat-rate and may be absent.
Delivery Charges	Account Invoices	Currency	Sum of delivery-related charges (not always lumped together).
Supply Charges	Account Invoices	Currency	Supply/energy charges; label varies (energy charges, cost of energy). Gas fallback: if not found, put all in Delivery and note supply included.
Water Service Charge	Account Invoices	Currency	Water service charge. Fallback: combine service+usage, note usage included.
Water Usage Charge	Account Invoices	Currency	Water usage charge. Same fallback as above.
Sewer Service Charge	Account Invoices	Currency	Sewer service charge. Same fallback.
Sewer Usage Charge	Account Invoices	Currency	Sewer usage charge. Same fallback.
Line Items / Other Charges	Account Invoices	Text Area	Each other charge listed out (e.g. conservation/gov fee).
Sub	Account Invoices	Currency	Amount of each individual line charge.

Field	Table	Type	How it works
Total	Account Invoices	Currency	Total of all charges on the bill.

Not Extracted

Field	Table	Type	How it works
Annual Usage	Calculated	-	12-month total added by hand from the bar chart.
Gallons / Days in cycle / Usage per unit per day	Calculated	-	Spreadsheet formulas. Water.
Marginal rate / per gallon / Avg daily usage	Calculated	-	Mrs. Krancer's post-extraction calculations.
Commodity	Utility Type	-	water/sewer/both handled via Utility Type, not a field.
Tax ID, Account Usage Type, Demand, Service Ref #, Customer Name Key	Not used	-	Left blank.
Modem rental, Internet Speed	Not used	-	Never used. Telecom.
Supplier Contracts tab	Not used	-	New tab, not yet in use.
