Helpful Definitions

CCF - The measurement taken from your meter. Usage is measured in hundreds of cubic feet.

Customer Charge - This charge includes administrative service costs (metering, billing, mailings, system maintenance and record keeping), and is incurred even if no gas is used.

Delivery Charge (Rider Rates) - A combination of charges and/or credits approved by the BPU which includes the costs of State mandated programs such as supporting energy efficiency initiatives that help customers reduce their energy usage, providing financial assistance to seniors and income-eligible customers and supporting the State's clean energy programs. It also includes the cost of environmental remediation projects, investments to replace aging infrastructure, thereby ensuring safety and reliability, and adjustments related to weather variability.

Delivery Charge (Commercial) - The cost to deliver gas to your business 24 hours a day, 7 days a week, 365 days a year, which includes the cost of BPU approved programs that benefit customers and the community.

Delivery Charge (Base Rate) - The cost to deliver gas to your home 24 hours a day 7 days a week 365 days a year.

Estimated Reading - Occurs when an actual meter reading cannot be obtained and is calculated based on weather and past consumption. Noted with an asterisk(*).

Gas Charge (BGSS) - The actual cost of the natural gas you use in your home for heat, water heating, cooking, drying clothes, and more. Total Gas Charges are calculated by multiplying the number of therms you use by the cost per therm. SJG does not earn a profit on the cost of natural gas. You pay what we pay.

NJ Energy Choice (Third-Party Supplier) - Offers consumers the option to purchase natural gas from a third-party supplier instead of the utility.

Price to Compare (PTC) - Calculation using a customer's natural gas usage and the cost per therm for that gas. This number is useful in helping to compare offers from third-party suppliers.

Therm - Basic unit for calculating your gas usage for billing.

Therm Factor - Factor used to convert CCF into therms.
